Professional Summary

Aspiring Data Engineer and recent B.Tech graduate in Computer Science and Engineering (Data Science) with a strong foundation in Python, SQL, database management, and data analysis. Currently learning Data Engineering concepts, including ETL processes, data pipelines, Google Cloud Platform (BigQuery, Cloud Storage), and PySpark. Passionate about transforming raw data into meaningful insights and eager to apply analytical and problem-solving skills to build scalable, efficient, and reliable data solutions while continuously learning modern data technologies.

Technical Skills

Programming Languages	Python, SQL
Databases	MySQL
Cloud Technologies	Google Cloud Platform (BigQuery, Cloud Storage)
Frameworks	Django
Data Analysis	Pandas, NumPy, Matplotlib
Developer Tools	Git, GitHub, VS Code, Jupyter Notebook

Internship Experience

Miracle Software Solutions

May 2025 – July 2025

Data Engineering Intern

Role

- Assisted in designing and implementing data engineering solutions for processing and managing structured datasets.

Responsibilities

- Collected, cleaned, and transformed raw datasets using Python and SQL.
- Developed ETL workflows for extracting, transforming, and loading data into relational databases.
- Optimized SQL queries for efficient data retrieval and reporting.
- Performed data validation and preprocessing to ensure data quality.
- Worked with relational databases and version control using Git.

Project Worked On

Employee Data ETL Pipeline

- Designed and developed an ETL pipeline to extract employee data from CSV files and load it into a MySQL database.
- Performed data cleaning, transformation, duplicate removal, and null value handling using Python and Pandas.
- Automated data loading and generated SQL-based reports for employee analytics.
- Improved data quality by validating and transforming raw datasets before loading them into the database.

Role

- Developed backend web applications using Django and implemented database-driven functionalities.

Responsibilities

- Built CRUD applications using Django ORM.
- Designed and managed MySQL database tables.
- Implemented user authentication and authorization modules.
- Developed RESTful APIs and integrated backend services.
- Collaborated using Git for version control.

Project Worked On
Student Management System

- Developed a web-based application for managing student information, attendance, and academic records.
- Designed relational database tables and implemented CRUD operations using Django ORM.
- Developed secure authentication modules and user dashboards.

Certifications

- Data Engineer - july 2026
- Python Bootcamp – Feb 2025
- TATA IAM Forage – April 2025
- Hackathon, BITS Pilani – Oct 2024
- Cisco Python Essentials – June 2025

Education

RIET College B.Tech	2022 – 2026
Sri Chaitanya Junior College Intermediate(MPC)	2020 – 2022
Satya Bhama E.M. School SSC	2019 – 2020
